

Overview

FXI's reactive dual-response design is engineered to enhance comfort and pressure relief while providing conforming support. The initial soft feel slowly conforms to the body before gently pushing back. Our unique chemistry produces a 3 lb foam that performs like a high density 4 lb foam, offering you and your customer a higher level of durability and comfort. Dual-Response Foam is also less temperature-sensitive than typical memory foams, providing a more consistent level of comfort across a broader range of temperatures.

Benefits

- Conforms to the body to provide pressure relief and support where it is needed most
- Consistent comfort and feel across an extended range of temperatures
- CertiPUR-US® certified

Dual-Response:
Conforming Comfort & Support

Pressure Relief

The Comfort of a Visco with Higher Support

Performance equal to a higher density foam

About FXI

FXI is a leading producer of foam innovation in the Bedding, Furniture, Industrial, Home & Office, Healthcare and Transportation Markets. Our focus is on finding tailored solutions for our customers that are driven by consumer insights and industry trends. Our products include finished goods, sub-assemblies, services and raw materials for OEMs, fabricators and retailers. You will find FXI's foam innovations inside, around and under yourself in countless applications. We protect automobile passengers on the highway, help consumers sleep sounder and furniture manufacturers create comfort. We provide for sharper images in digital printers and help consumers keep their homes clean. We provide critical components for filters, gaskets and seals in everything from blood oxygenators to computer disk drives. Everywhere foam goes; FXI's innovations lead the way.
